

2 Channels Telecontrol PWA Series Transmitter and Receiver Board 220VAC 4th Generation

Key features

- Dual Channel Control: Allows for simultaneous operation of two separate devices, enhancing versatility.
- 220VAC Compatibility: Specifically designed for use with 220VAC electrical systems, ensuring broad applicability.
- Durable Construction: Built to withstand harsh conditions, ensuring long-lasting performance in various environments.

2 Channels Telecontrol PWA Series Transmitter

The 2 Channels Telecontrol PWA Series Transmitter and Receiver Board (220VAC, 4th Generation) is an advanced remote control system designed for efficient operation of various electrical devices. This 4th generation model features dual-channel functionality, enabling seamless control of two independent devices. Its robust design and intuitive interface make it suitable for both industrial and residential applications.
