

Thermometer -40°~+120° 24v

Key features

- Wide Temperature Range: Measures temperatures from -40°C to 120°C, making it suitable for a variety of applications, including refrigeration, HVAC, and process monitoring.
- 24V Power Supply: Operates efficiently on a 24V power supply, making it ideal for integration into existing systems and equipment.
- Durable Construction: Built to withstand harsh environmental conditions, ensuring long-lasting performance in demanding settings.
- 3 Year Warranty, Customer Support and Service in the USA

Thermometer -40°~ 120° 24v Description

The -40° to 120° Thermometer is a high-performance temperature measuring device designed for a wide range of applications, providing accurate and reliable readings in various environments. Its robust design and wide temperature range make it suitable for industrial, commercial, and residential use.
