

EZXDB1122A1 Dynamic Brake (Resistor 841-012 NOT INCLUDED) 208-230V for PWHC500U

Key features

- Dynamic Braking Capability: Allows for rapid deceleration and improved control of motor speed, enhancing overall performance.
- Voltage Rating: Operates efficiently within a 208-230V range, suitable for standard industrial power setups.
- Resistor Not Included: Note that the required resistor (841-012) is not included and must be purchased separately to complete the braking system.
- 1 Year Warranty, Customer Support and Service in the USA

EZXDB1122A1 Dynamic Brake Description

EZXDB1122A1 Dynamic Brake is designed to enhance the performance and safety of the PWHC500U series. Operating at 208-230V, this dynamic brake module facilitates effective braking by dissipating excess energy generated during deceleration, providing improved control and stability for motor-driven applications.

Technical Specifications

Warranty	1 Year
