Radio Remote Control Description

Prowinch's OEM Industrial Wireless Control System has been specially designed to meet all the latest requirements in the industry and also based on our customer's feedback. Beside having all the professional and usual functions and setups our new line offers simplicity to everyday needs. Now adding a second transmitter, replacing transmitters, joining twin units or other customizable setups are easier than ever, no need to get hard to find quartz to match frequencies or need of software or copiers to pair transmitters and receivers. Pairing can be made from the same transmitter even if you lost the original or you have no information of the current frequency and code, all with the highest security to avoid unwanted pairing or interference from other devices.
