

Braking Resistor 1.67 Kw 57 Ohms IP66 for Invertek OPC-2-240058-3F41003E

Key features

- Power Rating: 1.67 kW for efficient energy dissipation.
- Resistance: 57 Ohms, tailored for optimal performance with the specified Invertek model.
- Ingress Protection: IP66 rating ensures protection against dust and water.

Braking Resistor 1.67 Kw 57 Ohms Description

Braking Resistor (1.67 kW, 57 Ohms, IP66) is engineered for use with the Invertek model OPC-2-240058-3F41003E. This component effectively dissipates excess energy during braking, enhancing the safety and performance of motor control systems in various industrial applications.

Technical Specifications

Total Power Watts	1670
