

## **Braking Resistor 0.3 Kw 62 Ohms IP66 for Invertek ODP-2-22020-1HF42-MN**

### **Key features**

- Power Rating: 0.3 kW for effective energy dissipation.
- Resistance: 62 Ohms, optimized for use with the specified Invertek model.
- Ingress Protection: IP66 rating ensures robust protection against dust and water.

### **Braking Resistor 0.3 Kw Description**

Braking Resistor (0.3 kW, 62 Ohms, IP66) is specifically designed for the Invertek model ODP-2-22020-1HF42-MN. This resistor efficiently dissipates excess energy during braking, improving safety and reliability in variable frequency drive applications.

## Technical Specifications

Total Power Watts	300
