

## **Braking Resistor 3.2 Kw 20 Ohms IP66 for Invertek ODP-2-32050-3HF42-MN**

### **Key features**

- Power Rating: 3.2 kW for effective energy dissipation.
- Resistance: 20 Ohms, optimized for compatibility with the specified Invertek model.
- Ingress Protection: IP66 rating ensures robust protection against dust and moisture.

### **Braking Resistor 3.2 Kw 20 Ohms Description**

Braking Resistor (3.2 kW, 20 Ohms, IP66) is specifically designed for the Invertek model ODP-2-32050-3HF42-MN. This high-performance resistor efficiently dissipates excess energy during braking, enhancing the safety and reliability of variable frequency drive systems.

## Technical Specifications

Total Power Watts	3200
