

Braking Resistor 3.7 Kw 20 Ohms IP66 for Invertek ODP-2-32050-3HF42-MN

Key features

- Power Rating: 3.7 kW for effective energy dissipation.
- Resistance: 20 Ohms, optimized for compatibility with the specified Invertek model.
- Ingress Protection: IP66 rating ensures robust protection against dust and moisture.

Braking Resistor 3.7 Kw 20 Ohms IP66 Description

Braking Resistor (3.7 kW, 20 Ohms, IP66) is specifically designed for the Invertek model ODP-2-32050-3HF42-MN. This high-performance resistor effectively dissipates excess energy during braking, enhancing safety and reliability in variable frequency drive applications.

Technical Specifications

Total Power Watts	3700
