

Fail Safety Brake 35000 N

Key features

- **High Braking Force:** Provides a robust braking force of 35,000 N, suitable for heavy loads and demanding operational environments.
- **Fail-Safe Design:** Engineered to engage automatically in case of power loss or system failure, ensuring that machinery comes to a safe stop and reducing the risk of accidents.
- **Durable Construction:** Manufactured from high-quality materials to withstand harsh conditions, ensuring long-lasting performance and minimal maintenance.
- **3 Year Warranty, Customer Support and Service in the USA**

Fail Safety Brake 35000 N Description

The Fail-Safe Brake is a high-performance braking solution designed to ensure maximum safety and reliability in heavy-duty applications. Capable of delivering a braking force of 35,000 Newtons, this brake is engineered for use in industrial machinery, lifting equipment, and other critical systems where safety is paramount.
