

Hydraulic Power Pack 5HP 2200 PSI with Directional Control Valve

Key features

- **Powerful Motor:** Equipped with a 5HP motor that provides high performance for demanding hydraulic applications, ensuring efficient operation.
- **High Pressure Capability:** Delivers hydraulic pressure up to 2200 PSI, suitable for a wide range of hydraulic tasks including lifting, clamping, and material handling.
- **Directional Control Valve:** Features a built-in directional control valve that allows precise control of hydraulic fluid flow, enabling efficient operation and maneuverability of connected hydraulic equipment.
- **3 Year Warranty, Customer Support and Service in the USA**

Hydraulic Power Pack 5HP 2200 PSI with Directional Control Valve Description

The Hydraulic Power Pack is a powerful and efficient solution for hydraulic applications requiring reliable and consistent hydraulic pressure. With a robust 5HP motor and capable of generating up to 2200 PSI, this power pack is designed to drive hydraulic systems in various industrial and commercial settings.
