

## Galvanized Steel Cable Fiber Core 4.7 MM 6X7

### Key features

- 4.7 MM Diameter: Ideal for medium-duty applications that require strength and flexibility.
- 6x7 Construction: Six strands of seven wires provide a balance of durability and flexibility, suited for tasks involving tension.
- Fiber Core: Enhances flexibility and ease of handling, making it more adaptable in applications requiring frequent movement.
- 1 Year Warranty, Customer Support and Service in the USA

### Galvanized Steel Cable Fiber Core 4.7 MM 6X7 Description

The Galvanized Steel Cable Fiber Core 4.7 MM 6x7 is a versatile and durable wire rope designed for medium-duty applications. It features a fiber core for added flexibility and a 6x7 construction—six strands with seven wires each—which enhances its strength and load-bearing capabilities. The galvanized finish ensures superior corrosion resistance, making it an excellent choice for both indoor and outdoor use, even in harsh weather conditions.
