

## C-32 Rail Support Bracket to beam (Weldable)

### Key features

- **Weldable Design:** Specifically designed for direct welding to beams, offering a permanent and secure attachment.
- **Heavy-Duty Construction:** Made from high-strength steel to withstand heavy loads and rigorous use in industrial environments.
- **Enhanced Stability:** Provides a solid foundation for festoon rails, preventing movement and ensuring safe operation.
- **3 Year Warranty, Customer Support and Service in the USA**

### C-32 Rail Support Bracket to beam Description

The C-32 Weldable Rail Support Bracket to Beam is a robust solution for securely attaching C-32 festoon rails to overhead beams. Designed for weldable applications, this bracket provides exceptional stability and strength, ensuring reliable support for material handling systems.
