

## Central Shaft for PWG600

### Key features

- **High-Quality Construction:** Manufactured from robust materials to withstand the stresses of heavy-duty lifting applications, ensuring durability and a long service life.
- **Precise Fit:** Specifically designed for the PWG600 hoist system, ensuring perfect alignment and compatibility with other hoist components for smooth operation.
- **Efficient Power Transmission:** Effectively transmits rotational power from the motor to the hoist drum, allowing for efficient and reliable lifting and lowering of loads.
- **3 Year Warranty, Customer Support and Service in the USA**

### Central Shaft for PWG600 Description

The Central Shaft for PWG600 is a critical component in the hoist's drivetrain system, designed to ensure smooth and efficient rotation of the hoist drum. This high-quality central shaft plays a vital role in transferring rotational power from the motor to the drum, enabling the lifting and lowering of heavy loads with precision. Built for heavy-duty applications, it is engineered for durability and long-lasting performance in demanding environments.

## Technical Specifications

## Unit Weight & Dimensions

Total Unit Weight

4 lbs / 2 Kg
