

17.5 Ton Double Girder Electric Wire Rope Hoist, VFD, Variable Speed, Forced Ventilation

Key features

- Load Capacity: 17.5 tons (35,000 lbs), suitable for heavy-duty lifting and industrial applications.
- Design: Double Girder, providing enhanced stability and load distribution for large and heavy loads.
- Variable Frequency Drive (VFD): Offers variable speed control, allowing for precise and smooth operation at different lifting speeds.

Electric Wire Rope Hoist Description

Maximize heavy-duty lifting with this 17.5-ton double girder electric wire rope hoist. Equipped with VFD and variable speed control for precision, it features forced ventilation to ensure continuous performance during long operations. Ideal for industrial applications requiring high-capacity and reliable lifting solutions.

Technical Specifications

Voltage 3 Phase 440~480V 60Hz
