

Base Flange motor side for PWK1250i and PWK625i

Key features

- **Specific Compatibility:** Tailored for both the PWK1250i and PWK625i models, ensuring a precise fit for optimal performance.
- **Robust Construction:** Made from high-quality materials that offer excellent strength and durability, capable of withstanding the rigors of heavy use.
- **Enhanced Stability:** Provides a solid foundation for the motor, minimizing vibrations and ensuring proper alignment during operation.
- **3 Year Warranty, Customer Support and Service in the USA**

Base Flange motor side for PWK1250i and PWK625i Description

The Base Flange Motor Side for the PWK1250i and PWK625i is a critical component designed to provide a stable mounting point for the motor. This flange ensures secure alignment and support, contributing to the overall efficiency and reliability of the winch system.
