

Spline housing - Part 11 - Central shaft for PWK12600i

Key features

- Critical Central Shaft Component: Supports the central shaft, enabling efficient power transmission and stability during operation.
- Compatible with PWK12600i Hoists: Engineered specifically for seamless integration with the PWK12600i model.
- Durable and Reliable: Manufactured from high-strength materials to handle demanding workloads and extend operational lifespan.

Spline housing - Part 11 - Central shaft Description

The Spline Housing (Part 11) is a vital component of the central shaft system in the PWK12600i hoist. Designed for precision and durability, it ensures smooth rotational motion and effective torque transfer within the hoist's mechanism.
