

## Round nut - Part 17 - for PWK12600i

### Key features

- Custom Fit: Engineered for compatibility with the PWK12600i third-level planetary gear system.
- Enhanced Stability: Maintains secure positioning of components to prevent loosening during operation.
- Robust Construction: Manufactured from high-strength materials for durability under heavy-duty use.

### Round nut - Part 17 Description

The Round Nut (Part 17) is a critical fastening component for the PWK12600i hoist, specifically designed to secure the assembly of the third-level planetary gear system. It ensures stability and precise alignment for efficient operation.
