

Joint spline housing - Part 23 - Secondary Shaft Coupler for PWK12600i

Key features

- **Seamless Coupling:** Connects the secondary shaft to adjacent components for efficient torque transfer.
- **Precision Engineering:** Ensures accurate alignment to prevent misfitting or operational inefficiencies.
- **Durable Construction:** Made from high-strength materials to withstand heavy-duty use and wear.

Joint spline housing - Part 23 Description

The Joint Spline Housing (Part 23) functions as the Secondary Shaft Coupler for the PWK12600i hoist, enabling seamless power transmission between the secondary shaft and connected components. Designed for precision and durability, it ensures smooth operation under heavy loads.
