

## Circlip - Snap Ring external - Part 30 - for PWK12600i

### Key features

- **External Design:** The external snap ring design allows for easy installation and secure retention of parts within the hoist assembly, preventing unwanted movement.
- **High-Strength Material:** Manufactured from durable, high-strength steel, this circlip is designed to withstand heavy loads and resist deformation, even in demanding environments.
- **Precision Engineering:** Designed for precise fitment within the PWK12600i system, ensuring that components remain securely in place and the hoist operates smoothly.

### Circlip - Snap Ring external - Part 30 Description

The Circlip - Snap Ring External (Part 30) for the PWK12600i is a crucial component used to secure and hold parts in place within mechanical assemblies. This external snap ring is specifically designed for use in the PWK12600i hoist system, ensuring the stability and safety of key components during operation.

## Technical Specifications
