

Bearing - Part 35 - for reducer central shaft of PWK12600i

Key features

- Precision Engineering: Designed specifically for the central shaft of the PWK12600i reducer, offering a perfect fit for optimal performance and longevity.
- Reduced Friction: Provides smooth rotation by minimizing friction between moving parts, enhancing the efficiency and lifespan of the system.
- Durable Construction: Made from high-quality materials to resist wear and tear, providing long-lasting durability even under demanding conditions.

Bearing - Part 35 Description

The Bearing - Part 35 for the reducer central shaft of the PWK12600i is a high-quality, precision-engineered bearing designed to provide smooth, efficient rotation and minimize friction within the hoist's reduction gear assembly. This bearing is crucial for ensuring the long-lasting performance and reliability of the reducer system.
