

## Two-three inner gear - Structural Housing - Part 42 - for PWK12600i

### Key features

- **Precise Fit:** Specifically engineered for the PWK12600i, ensuring a secure and accurate fit for the inner gears.
- **Durable Construction:** Made from high-strength materials to resist wear, pressure, and high-stress conditions, enhancing the overall performance of the hoist system.
- **Heavy-Duty Performance:** Built to withstand industrial environments, including high-load and high-speed operations, ensuring long-term reliability.

### Two-three inner gear - Structural Housing Description

The Two-Three Inner Gear - Structural Housing - Part 42 for the PWK12600i is a vital component of the hoist's gearing system, designed to house and support the inner gears for seamless transmission of motion and power. This structural housing ensures the durability and smooth operation of the hoist mechanism, especially under heavy load conditions.
