

## Hexagonal cylindrical screw for PWK12600i reducer - Part 45 -

### Key features

- **Durable Construction:** Made from high-quality, corrosion-resistant materials, providing strength and longevity in demanding environments.
- **Hexagonal Design:** The hexagonal shape allows for easy handling and secure tightening with standard tools, ensuring a tight and stable connection.
- **Precision Fit:** Specifically designed for the PWK12600i reducer, ensuring a perfect fit and optimal performance in the hoist system.

### Hexagonal cylindrical screw Description

The Hexagonal Cylindrical Screw for PWK12600i Reducer - Part 45 is a vital component used in the assembly of the reducer for the PWK12600i hoist system. This high-strength screw is designed to ensure a secure and stable connection between critical parts of the reducer, helping to maintain the hoist's overall performance and reliability.

## Technical Specifications
