

## Bearing Disk - Reducer Input Flange for PWK12600i - Part 47 -

### Key features

- **High-Quality Bearings:** Designed to support the input flange of the reducer, this bearing disk provides optimal smoothness and stability for the hoisting mechanism.
- **Durable Construction:** Made from high-strength materials that ensure longevity and resistance to wear, even under high loads and continuous operation.
- **Perfect Fit for PWK12600i:** Specifically engineered for the PWK12600i hoist, ensuring seamless compatibility and high performance with the system.

### Bearing Disk - Reducer Input Flange Description

The Bearing Disk - Reducer Input Flange for PWK12600i - Part 47 is a vital component in the mechanical transmission system of the PWK12600i hoist. This bearing disk ensures smooth rotation of the reducer input flange, enabling the seamless transfer of torque and enhancing the overall efficiency and performance of the hoist system.

## Technical Specifications
