

Hexagonal cylindrical screw for PWK12600i reducer - Part 48 -

Key features

- **High-Strength Construction:** Made from durable, high-quality materials that provide strength and resistance to shear forces, ensuring a long lifespan and reliable performance.
- **Hexagonal Design:** The hexagonal shape allows for easy tightening and secure installation using standard tools, ensuring a firm and tight fit within the reducer assembly.
- **Precision Engineering:** Manufactured to exact specifications to ensure proper alignment and a precise fit in the reducer housing, helping maintain optimal function and reducing the risk of component failure.

Hexagonal cylindrical screw Description

The Hexagonal Cylindrical Screw for PWK12600i Reducer - Part 48 is a critical fastening component designed for the reducer assembly of the PWK12600i hoist system. This screw ensures secure and stable attachment of components within the reducer housing, contributing to the overall integrity and safety of the hoist's mechanical system.
