

Braking diamonds for PWK12600i reducer - Part 49 -

Key features

- **Premium Friction Material:** Constructed from high-grade braking material, the diamonds offer superior friction properties to ensure smooth, reliable braking performance.
- **Precision Design:** Specifically engineered for the PWK12600i hoist system, ensuring a perfect fit and optimal braking force without compromising the overall functionality of the reducer.
- **High Durability:** Designed to withstand heavy-duty use and high temperatures, offering long-lasting performance and reducing the need for frequent replacements.

Braking diamonds Description

The Braking Diamonds for PWK12600i Reducer - Part 49 are crucial components within the braking system of the PWK12600i hoist's reducer. These high-quality braking diamonds provide reliable friction to ensure the smooth and efficient stopping and controlling of the hoist system.
