

Bearing 6017 -Part 43 - Drum Bearing For PWK4300i Winch

Key features

- **Premium Quality Bearing:** The Bearing 6017 is made from high-strength materials to provide superior durability and long service life under demanding conditions.
- **Perfect Fit for PWK4300i Winch:** Specifically designed for the drum of the PWK4300i winch, ensuring compatibility and optimal performance.
- **Smooth Operation:** Provides smooth rotation of the drum, reducing friction and wear, which leads to increased efficiency and less maintenance.

Bearing 6017 -Part 43 - Drum Bearing Description

The Bearing 6017 - Part 43 - Drum Bearing for PWK4300i Winch is a high-quality replacement component designed to fit the drum assembly of the PWK4300i winch. This bearing plays a crucial role in providing smooth and reliable rotation of the drum, ensuring the efficient operation of your winch system. Manufactured to strict specifications, the Bearing 6017 offers durability, performance, and enhanced load-bearing capacity for heavy-duty applications.
