

## Hexagonal Nut for Pitman Shaft - Part 46 - Nut for structural Steel bar for PWK4300i

### Key features

- **Heavy-Duty Construction:** Made from high-strength materials, the hexagonal nut offers superior durability and resilience, making it ideal for demanding winching applications.
- **Perfect Fit for PWK4300i Winch:** Specifically designed for use with the pitman shaft in the PWK4300i winch, ensuring compatibility and a secure connection within the winch assembly.
- **Reliable Performance:** The hexagonal shape allows for easy and efficient installation, providing a tight and secure hold to prevent loosening under high torque or vibration.

### Hexagonal Nut for Pitman Shaft Description

The Hexagonal Nut for Pitman Shaft - Part 46 is a critical component used in the structural assembly of the PWK4300i Winch. This heavy-duty hexagonal nut is designed specifically for the pitman shaft, ensuring a secure fit and optimal performance for the winch's structural steel bars. Manufactured with precision, this nut guarantees reliable fastening and the durability needed to withstand the stresses of heavy-duty winching operations.
