

Oil Seal diameter - Part 49 - for PWK4300i

Key features

- **High-Quality Material:** Manufactured from durable, oil-resistant materials that ensure long-lasting performance and protection against wear and tear.
- **Precise Fit:** Designed specifically for the PWK4300i Winch, ensuring a perfect fit for easy installation and reliable performance.
- **Leak Prevention:** Effectively prevents oil leakage, maintaining proper lubrication of the winch's internal components and reducing the risk of premature wear.

Oil Seal diameter Description

The Oil Seal Diameter - Part 49 is an essential component for the PWK4300i Winch, designed to prevent oil leakage and protect the internal mechanisms of the winch. It provides a reliable seal between rotating and non-rotating parts, ensuring the lubrication stays intact and contaminants are kept out of the system, contributing to the longevity and smooth operation of the winch.
