

Spline housing - Part 55 - Central shaft for PWK4300i

Key features

- **Durable Construction:** Made from high-quality, robust materials that are resistant to wear and tear, ensuring long-lasting durability even under heavy use.
- **Precision Fit:** Designed to precisely fit the central shaft of the PWK4300i, ensuring smooth and efficient engagement with the connected components.
- **Efficient Torque Transmission:** The housing facilitates the effective transfer of torque from the motor to the winch drum, contributing to optimal performance.
- **3 Year Warranty, Customer Support and Service in the USA**

Spline housing - Part 55 Description

The Spline Housing - Part 55 is an essential component for the PWK4300i winch, designed specifically for the central shaft. It serves as a crucial part of the winch's mechanical assembly, ensuring efficient torque transmission from the motor to the drum. This part is integral in maintaining the winch's smooth operation by providing the necessary support and housing for the spline shaft, ensuring proper engagement of moving parts.
