

Deputy Disk - Brake press for PWK4300i -Part 6-

Key features

- Brake Press Disk: Designed for the PWK4300i winch to work seamlessly with the brake press system, contributing to effective load control.
- High-Quality Construction: Made from durable materials that withstand high-pressure and friction conditions, ensuring long-lasting performance.
- Optimized for PWK4300i: Specifically designed to fit the PWK4300i winch system, ensuring a perfect match and reliable performance.

Deputy Disk - Brake press Description

The Deputy Disk - Brake Press for PWK4300i - Part 6 is an essential component of the PWK4300i winch braking system. This disk plays a crucial role in the brake assembly, ensuring efficient braking performance when the winch is engaged. It provides support and functionality in the braking press mechanism, contributing to smooth and reliable operation in demanding lifting and pulling tasks.
