

Rotor for PWLD850012V SPLINED SHAFT

Key features

- **Model Compatibility:** Specifically designed for the PWLD8500 (12V) winch, ensuring optimal fit and functionality.
- **Durable Construction:** Manufactured from high-quality materials that provide excellent resistance to wear, heat, and corrosion, ensuring long-lasting performance.
- **Splined Shaft Design:** The splined shaft allows for improved torque transfer and alignment, enhancing the overall efficiency of the winch operation.
- **3 Year Warranty, Customer Support and Service in the USA**

Rotor for PWLD850012V SPLINED SHAFT Description

The Rotor for the PWLD8500 (12V) with a splined shaft is a crucial component of the winch motor, designed to efficiently convert electrical energy into mechanical energy. This specific rotor design enhances the performance and reliability of heavy-duty lifting tasks.
