

East/West Button for PWR series Double speed

Key features

- **Dual-Speed Control:** Allows for precise movement of loads in both east and west directions at two distinct speed settings, enabling operators to choose the optimal speed for each task.
- **Designed for PWR Series Double Speed Hoists:** Tailored for use with PWR Series double-speed hoists, ensuring smooth integration and enhanced functionality within your hoisting system.
- **Durable and Robust Construction:** Built with high-quality materials designed to withstand harsh industrial environments, ensuring long-lasting durability and reliable performance.

East/West Button for PWR Series Description

The East/West Button for the PWR Series Double Speed is an essential control feature that provides precise, bidirectional control for hoists with dual-speed functionality. This button allows operators to efficiently move loads in both the east and west directions at different speeds, offering greater flexibility and control in various industrial applications. Ideal for tasks requiring both fast and slow load adjustments, this button enhances operational efficiency while maintaining high safety standards.
