

Control Transformer 220/380/440-24V 100 VA PWR10 and PWR20

Key features

- Input Voltage Range: 220V, 380V, or 440V AC - This transformer is designed to handle a wide range of industrial input voltages, making it suitable for different regions or equipment with varying electrical standards.
- Output Voltage: 24V AC - The transformer steps down the input voltage to a 24V AC output, which is commonly used for control systems in industrial machinery, including hoists and winches.
- Power Rating: 100 VA (Volt-Amps) - This indicates the transformer can supply up to 100 VA of power, which is the total power available for the connected load. The VA rating is important to ensure the transformer can handle the required load without overloading.

Control Transformer Description

The Control Transformer 220/380/440-24V 100 VA is a power supply component designed for use in various industrial systems, such as the PWR10 and PWR20 series, typically found in winches or hoists. This transformer steps down the high voltage (220V, 380V, or 440V) to a lower 24V output, providing the necessary voltage to power control circuits and low-voltage components within the system.

Technical Specifications

Unit Weight & Dimensions

Total Unit Weight	0.5 lbs / 1 Kg
--------------------------	----------------

Packaging Weight & Dimensions

Package 1 Net Weight	0.5 lbs / 0 Kg
-----------------------------	----------------

Package 1 Width	5 in / 12.7 cm
------------------------	----------------

Package 1 Gross Weight	1 lbs / 0 Kg
-------------------------------	--------------

Package 1 Height	5 in / 12.7 cm
-------------------------	----------------

Package 1 Length	5 in / 12.7 cm
-------------------------	----------------
