

Control Transformer 220/380/440-24V 30 VA all series PWR up to 1 ton

Key features

- **Input Voltage Range:** The transformer can handle 220V, 380V, or 440V AC, making it versatile and adaptable for various international standards and industrial environments.
- **Output Voltage:** 24V AC - The stepped-down output voltage is ideal for powering control circuits, limit switches, remote controls, and other low-voltage components in winch and hoist systems.
- **Power Rating:** 30 VA (Volt-Amps) - This indicates that the transformer can provide up to 30 VA of power, suitable for smaller control systems with lower power demands.

Control Transformer Description

The Control Transformer 220/380/440-24V 30 VA is designed for smaller winch or hoist systems, specifically those within the PWR series up to 1 ton capacity. It serves the critical role of converting high voltage AC power (220V, 380V, or 440V) to a lower, standardized 24V AC output, which is used to power the control circuits and components of smaller winch and hoist systems.

Technical Specifications

Unit Weight & Dimensions

Total Unit Weight	2 lbs / 1 Kg
--------------------------	--------------

Packaging Weight & Dimensions

Package 1 Net Weight	2 lbs / 1 Kg
-----------------------------	--------------

Package 1 Width	5 in / 12.7 cm
------------------------	----------------

Package 1 Gross Weight	2.1 lbs / 1 Kg
-------------------------------	----------------

Package 1 Height	5 in / 12.7 cm
-------------------------	----------------

Package 1 Length	5 in / 12.7 cm
-------------------------	----------------
