

Festoon Power x Meter C-32 4x4mm²

Key features

- High-Conductivity Copper: Constructed with quality copper conductors to ensure excellent electrical conductivity and minimal energy loss.
- Robust Insulation: Features strong insulation to protect against abrasion, wear, and environmental exposure, ensuring safety and longevity.
- Flexible Design: The cable is designed for easy handling and routing within festoon systems, accommodating movement and bends without compromising performance.
- 3 Year Warranty, Customer Support and Service in the USA

Festoon Power x Meter Description

The Festoon Power Cable C-32 4x4 mm² is designed for reliable power transmission in overhead festoon systems. This durable cable is ideal for various industrial applications, providing efficient electrical performance and flexibility.
