

Step-Up Transformer 208 to 240V 2kW

Key features

- Voltage Conversion: Steps up the 208V input to a stable 240V output, enabling the use of equipment designed for 240V power.
- Power Rating: Supports up to 2kW of power, suitable for medium to high-demand applications.
- High Efficiency: Delivers efficient voltage conversion, reducing energy loss and ensuring smooth operation of connected devices.

Step-Up Transformer 208 to 240V 2kW Description

The Step-Up Transformer is designed to efficiently convert 208V input voltage to 240V output voltage, with a power rating of 2kW. It is ideal for applications that require a higher output voltage to power equipment or machinery that operates at 240V, while utilizing the available 208V power supply.

Technical Specifications

Unit Weight & Dimensions

Total Unit Weight	10 lbs / 5 Kg
--------------------------	---------------

Packaging Weight & Dimensions

Package 1 Net Weight	10 lbs / 5 Kg
-----------------------------	---------------

Package 1 Width	12 in / 30.48 cm
------------------------	------------------

Package 1 Gross Weight	15 lbs / 7 Kg
-------------------------------	---------------

Package 1 Height	12 in / 30.48 cm
-------------------------	------------------

Package 1 Length	15 in / 38.1 cm
-------------------------	-----------------
