

MOVIDRIVE VDF SEW 46.2KVA 65Amp. + Dynamic Brake + Choke + Encoder

Key features

- Power Rating: 46.2 kVA, ideal for large motor applications requiring substantial power.
- Current Rating: 65 amps, providing reliable performance for demanding industrial tasks.
- Dynamic Braking: Integrated dynamic brake system for efficient stopping and energy recovery, enhancing system efficiency.

MOVIDRIVE VDF SEW 46.2KVA 65Amp. Description

The MOVIDRIVE VFD (Variable Frequency Drive) by SEW EuroDrive is a robust solution engineered for high-performance motor control in industrial applications. With a power rating of 46.2 kVA and a current capacity of 65 amps, this VFD features dynamic braking, a choke, and encoder support, ensuring efficient operation and precise control.
